Issues...

Labour has brought huge benefits to London, like the return of London Government, investment in schools and hospitals — and the Olympics!

Nevertheless, there continue to be challenges ranging from affordable housing to racism, child poverty and the looming threat of climate change.

This Queen's speech was themed around "security in a changing world", and is the first Queen's speech since the London bombings.

It included a climate change bill, new powers for the Mayor of London, and a raft of crime and anti-social behaviour measures. Added to this are reforms to immigration systems, Further Education, pensions and welfare systems.

Join London Young Labour to discuss these issues and others.
